

Butterfly Mask

- Cut out mask and eye holes.
- Colour in and decorate.
- Make holes where the two small circles are on the wings.
- Attach string or elastic to wear.
- Flutter, fly and find some flowers!

Each kind of butterfly has its own colour and pattern. This helps it to recognise its own kind. Some butterflies, like the peacock butterfly, have eye spots on their wings. The eye spots startle predators who think they are looking at the eyes of larger and more dangerous animals!
