

Mighty Macaw

The Macaw is a large colourful parrot found in the tropical rainforests of Mexico and South and Central America. There are 17 different species of Macaw, each with its own beautiful colour combination. Many Macaws have bright red, blue, green, yellow and orange feathers. Make this mask to transform yourself into a mighty Macaw of many colours!

What to do

1. Cut out the mask, including the eye holes.

2. Colour in and decorate with brightly coloured collage materials.

3. Punch two holes over the small circles at each end and tie-on some elastic.

**Your mask is ready to wear!
Flap your wings and parade those feathers with pride.**
